Education and Training

- **9/2010 - 7/2012.** Postdoctoral Fellow, Mathematical Biosciences Institute, Ohio State University, Columbus, OH.
- **9/2009 - 8/2010.** Postdoctoral Associate, Institute for Theoretical and Mathematical Ecology, University of Miami, Coral Gables, FL.
- **12/2009.** Ph.D. in Mathematics. Dissertation: *Mathematical Analysis of the Use of Trojan Y Chromosomes as Means of Eradication of Invasive Species*. Advisor: Dr. Monica K. Hurdal. Department of Mathematics, Florida State University, Tallahassee, Florida.
- **05/2005.** M.Sc. in Biomedical Mathematics. Department of Mathematics, Florida State University, Tallahassee, Florida.
- **05/1996.** B.Sc., Civil Engineering, Meritorious Thesis. National Prize of Excellence in B.Sc. Thesis, National University of Colombia.

Appointments and Professional Experience

- Chair of the Department of Mathematics, University of Texas at San Antonio, August 2019 to present.
- Professor of Mathematics, University of Texas at San Antonio, August 2019.
- Adjunct Associate Professor of Mathematics, University of Georgia, Athens, Georgia. August 2019 to July 2024.
- Interim director of the Latin American and Caribbean Studies Institute, University of Georgia, Athens, Georgia. Jan-Jun, 2018.
- Associate Professor of Mathematics and Bioinformatics, University of Georgia, Athens, Georgia. August 2016 to July 2019.
- Adjunct Associate Professor of Computer Science, University of Georgia, Athens, Georgia. August 2017 to July 2019.
- Assistant Professor of Mathematics and Bioinformatics, University of Georgia, Athens, Georgia. August 2012 to July 2016.
- President. CAVIIAR Inc (*Centro Avanzado de Investigación en Inteligencia Artificial* – Advanced Research Center in Artificial Intelligence). Tallahassee, FL. Duties: Manage a non-profit scientific corporation. Build mathematical models and their computational implementation (dynamical systems, partial differential equations, pattern classification, operations research). 2007 - 2009.

- Senior Programmer/Analyst, Information Systems of Florida. Tallahassee, FL. Duties: Design enterprise web systems architecture, set development standards, design enterprise relational databases, write specifications for programmers, program according to specifications, design web pages, design and develop GIS applications, review and analyze solicitations. 2000 - 2008.
- Independent Engineer. Structural design, hardware, and software design for petroleum industry. 1999 - 2000.
- Author. Fiction writer funded with grants by the Colombian Ministry of Culture and the Bogotan Institute of Culture. See the Non-Scientific Publications section. These novels were the first electronic novels in the Spanish language. To date, there are several dissertations, masters thesis, and peer-reviewed manuscripts studying these pieces. I obtained my green card in 2007 as a self-petitioned Alien of Extraordinary Ability (EB-1A) for my contributions to the field of electronic literature. See [Employment-Based Immigration: First Preference EB-1](#) at the USCIS web site.
- Design Engineer. Inprotekto Ltda. Geographic Information Systems (GIS) and transportation models. 1996
- Engineering Assistant. Inprotekto Ltda and PCA Ltda. Several activities involving GIS data acquisition, structural design, aqueducts. 1992 - 1995

Leadership

- Between January and June, 2018, I was the Interim Director of the Latin American and Caribbean Studies Institute (LACSI). My role, in addition to the traditional functions of an institute director, was to prepare and submit a Title VI Department of Education FLAS grant. The grant was submitted in June, 2018, for a total of \$2.2M and it was awarded.
- I was hired in 2012 at UGA as an assistant professor, but also with a role under the Office of the Vice President for Research to create a unit in charge of managing the preparation and submission of complex grants. Between 2011 and 2016, I managed the submissions of five complex grant proposals totaling \$32M. The successor of that effort is the now well-established Office of Proposal Enhancement at UGA <https://research.uga.edu/proposal-enhancement/>; this office is credited for the advances in national research ranking of UGA. See the article “[UGA advances in national research ranking](#)”, December 15, 2017, UGA Today.
- Leadership training at: (i) the Summer Leadership Institute of the Society for the Advance of Chicanos and Native Americans in Science, SACNAS, 2011, (ii) the Advanced Leadership Institute, SACNAS, 2014, and (iii) the Leadership Institute, UGA, 2018, a selective track to nurture future leaders at the University of Georgia.
- Between 2007 and 2009, I founded and directed CAVIAR (*Centro Avanzado de Investigación en Inteligencia Artificial* – Advanced Research Center in Artificial Intelligence), a non-profit scientific corporation based in Florida. While being a graduate student, I attracted \$100K for research projects funded by the Spanish Ministry of Industry and the Florida Department of Agriculture.

Research

My current **research** efforts in **quantitative biology** focus on **multi-scale analysis of infectious disease** and other ecological problems: (i) the characterization of malaria, from the within-host dynamics to the epidemiology of this infectious disease, and (ii) modeling dispersal and population dynamics of genetically modified organisms. In my lab we produce mathematical, computational, and statistical models ranging from molecular interactions to spatial distribution and interaction of populations.

My current efforts in **education** focus on **adaptive learning**. We have created in my lab an Adaptive Learning System for Interdisciplinary Collaborative Environments (ALICE). This system offers competency-centered adaptivity (a syllabus is created for each student based on what they do not know), and interest-based adaptivity (examples respond to students' interests). The multi-lingual web-based pilot has shown improvements in student performance with strong statistical significance.

Sponsored Projects

1. (PI Gutiérrez) ALICE (Adaptive Learning for Interdisciplinary Learning Environments, 2016-2019, \$299,000), NSF award #1645325: ALICE is a Web-based information system that generates individualized development plans, according to previous experiences and current challenges. Furthermore, ALICE is designed to connect lexias from multiple subject matters, thus bypassing disciplinary barriers that in many cases are artificial. The principles behind ALICE are generalizable, and hence it has the potential to be used in K-16, graduate, and continuing education. ALICE is based upon the Literatronica engine I designed and implemented between 1996 and 2005.
2. (Co-PI Gutiérrez, PI Galinski) Technologies for Host Resilience (2016-2019, \$1,573,674 UGA out of \$6.5M) - Host Acute Models of Malaria to study Experimental Resilience (THoR's HAMMER), DARPA contract #W911NF-16-C-0008, 2016-2019. This project explores the molecular mechanisms of resilience, susceptibility and resistance of non-human primate hosts when challenged with a malaria infection. I direct the computational biology team in charge of building mathematical models of resilience.
3. (Co-PI Gutiérrez, PI Barbour) Collaborative Research: NSF INCLUDES: An Integrated Approach to Retain Underrepresented Minority Students in STEM Disciplines (2016-2019, \$117K). NSF award 1649226. The University of Georgia, Florida International University, Savannah State University, Clark Atlanta University and Fort Valley State University will lead this Design and Development Launch Pilot to address enhancing recruitment, retention, productivity and satisfaction of historically underrepresented minority (URM) undergraduate students who enroll in STEM graduate programs at primarily white (PWI) and research intensive (RI) universities.
4. (Co-I Gutiérrez, PI Galinski) Malaria Host-Pathogen Interaction Center (MaHPIC - 2012-2017, \$19.5M) NIH's NIAID contract HHSN272201200031C. PI Mary Galinski. MaHPIC involves the multidisciplinary study of malaria infections, immunity and pathogenesis of *P. falciparum*, *P. vivax* and *P. knowlesi* in the context of host-pathogen interactions, in humans and nonhuman primates, using a systems biology approach. Three nonhuman primate malaria species will be studied: *P. coatneyi* to model *P. falciparum*, *P. cynomolgi* to model *P. vivax*, and *P. knowlesi*, a monkey malaria species that has been causing illness and cases of death in humans in Southeast Asia. My role in MaHPIC: mathematical modeling based on 'omics data (functional genomics, lipidomics, proteomics, metabolomics).
5. (PI Herrera, PI of sub-award Gutiérrez) International Centers for Excellence in Malaria Research - Center for non-Amazonian regions of Latin America (2012-2017, \$159K for UGA out of \$5.5M) - CLAIM, NIAID cooperative agreement U19AI089702-01, 2010-2017. PI Socrates Herrera. CLAIM was divided into three projects: Project 1 evaluating the diversity of the ecology and parasite populations related to the epidemiology and clinical findings to establish a scientific framework to support the development of new intervention strategies for malaria elimination in non-Amazonian areas of Latin America. Project 2 addressing major gaps in understanding of the ecology, behavior, vector potential, and control of *Anopheles* malaria vectors to guide the development and implementation of more effective integrated vector management (IVM) strategies of National Malaria Control Programs (NMCPs). Project 3 determining the clinical outcomes and their association with parasite and host features of malaria-infected individuals living in non-Amazon regions of LA with different intensities of malaria transmission. My role in CLAIM: Data manager and mathematical modeler.

6. (PI Gutiérrez) Modeling dispersal of invasive snail species in Florida. Florida Department of Agriculture, Division of Aquaculture. 2008, \$2,500. This project created a reaction-diffusion model to predict the dispersal of apple snail (*Pomacea canaliculata*) across the state of Florida.
7. (PI Borràs, PI of subaward Gutiérrez) DISCOVER-LIT. Sub-award from contract TSI-070300-2008-67, funded by the Spanish Ministry of Industry. This project intended to create an information system based on the Literatronica engine to allow visitors in the City of Barcelona to get lost in the discovery of the city. 2008-2009, \$100K sub-award out of a \$300K research contract.
8. (PI Gutiérrez) *Contravía* (Counterway). Award # IDCT-410/1998 by the *Instituto Distrital de Cultura y Turismo* (Institute of Culture and Tourism of the City of Bogota) to develop the Literatronica system. 1998-1999, \$12K.
9. (PI Gutiérrez) *Condiciones Extremas* (Extreme Conditions). Award # IDCT-514/1997 by the *Instituto Distrital de Cultura y Turismo* (Institute of Culture and Tourism of the City of Bogota) to write the experimental electronic novel *Condiciones Extremas*. 1997-1998, \$30K.
10. (PI Gutiérrez) *El Primer Vuelo de los Hermanos Wright* (The First Flight of the Wright Brothers). Award # COLCULTURA-SECAB 014/1996 by the *Instituto Colombiano de Cultura - Colcultura, now the Ministry of Culture* (Colombian Institute of Culture, now the Ministry of Culture) to write the experimental electronic novel *El Primer Vuelo de los Hermanos Wright*. 1996-1998, \$8K.

Awards

- 2021 Diversity, Equity and Inclusion Award. Sponsored by Oak Ridge National Lab. Awarded on July 29, 2021 by the Society for Mathematical Biology.
- 1998 Civic Medal of the City of Bogota. Decree 504, August 4, 1999. Office of the Mayor of Bogota, Enrique Peñalosa Londoño. Awarded for public engagement with the community as a novelist.
- 1996 First Prize. Excellence in Engineering Thesis, November 28, 1996. Awarded by the Society of Civil Engineers, AICUN. Bogota, Colombia.

Graduate Students (2 M.Sc., 8 Ph.D.)

- 2019 Jessica A. Brady. Ph.D. in Engineering. *Mathematical modeling in health and disease*. Committee Chair: Juan B. Gutiérrez, Karen Hallow. Committee Members: Juan B. Gutiérrez, Karen Hallow, Xianqiao Wang, Caner Kazanci, Jonathan Arnold.
- 2019 Zerotti Woods. Ph.D. in Mathematics. *A new regularization term for deep neural networks with applications to biological data*. Committee Chair: Juan B. Gutiérrez. Committee Members: Juan B. Gutiérrez, Qing Zhang, Daniel Krashen, Caner Kazanci.
- 2019 Tao Sheng. Ph.D. in Bioinformatics. *Integration of transcriptomic and high frequency telemetry data via machine learning methods*. Committee Chair: Juan B. Gutiérrez. Committee Members: Juan B. Gutiérrez, Liang Liu, Jessica Kissinger, Jonathan Arnold.
- 2019 Diego M. Moncada-Giraldo. Masters in Bioinformatics.
- 2018 Valerie N. Flint. Ph.D. in Bioinformatics. *Shield: SNV heuristic identification, exploration, and location detector*. Committee Chair: Juan B. Gutiérrez. Committee Members: Juan B. Gutiérrez, Shaying Zhao, Liang Liu, Jonathan Arnold.
- 2018 Matthew T. Houston. Ph.D. in Mathematics. *The FRiND model: a mathematical model for representing immunological interactions in muscular dystrophy pathogenesis*. Committee Chair: Juan B. Gutiérrez. Committee Members: Juan B. Gutiérrez, Qing Zhang, Caner Kazanci, Jonathan Arnold.

- 2018 Elizabeth D. Trippe. Ph.D. in Bioinformatics. [Data Integration for Systems Biology](#). Committee Chair: [Juan B. Gutiérrez](#). Committee Members: [Juan B. Gutiérrez](#), Jonathan Arnold, Jessica Kissinger, David Peterson.
- 2018 Bolanle O. Salaam. Masters in Applied Mathematical Sciences.
- 2017 Karen E. Aguar, Ph.D. in Computer Science. [SAIL: A system for adaptive interest-based learning in STEM education](#). Committee Chairs: [Juan B. Gutiérrez](#), Hamid R. Arabnia. Committee Members: [Juan B. Gutiérrez](#), Hamid R. Arabnia, Thiab R. Taha, Walter D. Potter.
- 2017 Yi H. Yan, Ph.D. in Bioinformatics. [Multi-Omic and multi-scale data integration for the characterization of malaria infection in non-human primates](#). Committee chair: [Juan B. Gutiérrez](#). Committee Members: [Juan B. Gutiérrez](#), Ying Xu, Julie Moore, Jonathan Arnold.

Fiction (8)

- 1996-2006 El primer Vuelo de los Hermanos Wright (The first Flight of the Wright Brothers). Written with support from the National Grants of The Ministry of Culture of Colombia (COLCULTURA), 1996. Grant COLCULTURA-SECAB 014/1996. Bogota, Colombia. With contributions by Carlos E. Herrera P. (programmer). Version 2: 2006. Currently available at <http://www.literatronica.com>
- 1998-2005 Condiciones Extremas (Extreme Conditions). Version 1: Multimedia novel (book and CD-ROM). Written with support from the Repository of Artistic Projects of the Institute of Culture of Bogota. Grants 514/1997 and 410/1998, Bogota, Colombia. Published by Multimedia Lab, Repository of Artistic Proposals 1997, Institute of Culture of Bogota. Version 2: 2002. Version 3: 2005. Currently available at <http://www.literatronica.com>
- 2000 Las Fricciones de San Sebastián. (The Frictions of St. Sebastian). Revista Avianca. Magazine of Avianca Airlines. Number 254. Bogota. Colombia. Mar, 2000. Pag. 66-69. Bogota, Colombia. 2000
- 2000 La Sagrada Geometría (The Sacred Geometry.) In Antología Colombiana de Ciencia Ficción (Companion of Colombian Science Fiction). Pag. 93-96. Rene Rebetez (ed.) Espasa, 2000. Bogota, Colombia. ISBN: 958-614-804-1. Also in In (CREA: An Expedition through the Colombian Culture). Ministry of Culture of Colombia (formerly Colcultura), 1995.
- 1999 Las Exquisitas Disquisiciones de Fray Leonardo Baz. (The exquisite reasoning of Father Leonardo Baz.) Gaceta. Magazine of the Ministry of Culture of Colombia. Pag. 150-145. Num. 44-45. Bogota, Colombia. 1999. ISSN: 0121-7194
- 1996 Siete Curiosas Formas de Morir. (Seven Curious Ways to Die). Unidad de Publicaciones. Facultad de Ingeniería. Universidad Nacional de Colombia (Publishing Unit. School of Engineering. National University of Colombia.) 1996.

- 1996 González, Archivos y Documentos. (Gonzalez, Files and Documents.) In Sunday Readings of El Tiempo (Sunday Readings from The Times), newspaper. 475,000 copies (ISSN: 0121-9790). Also in Carta Universitaria, Journal of the National University, December 1996. Bogota, Colombia. ISSN: 0122-2929. Winner of the International Story Award ‘Carlos Castro Saavedra’, 1996, Medellin, Colombia.
- 1995 Atyseikuiwandiú, o los Avatares de la Cruel Sangre (Atyseikuiwandiú, or the Fortune of the Cruel Blood). In Lecturas Dominicales de El Tiempo (Sunday Readings from The Times), newspaper. 01/15/1995. Bogota, Colombia. 475,000 copies (ISSN: 0121-9790). Also in Ko’eyú, Journal of Cultural and Politic Analysis. Number 64, April-June 1994. Caracas, Venezuela. Winner of the International Story Award ‘Ko’eyú Latinoamericano’, 1995, Caracas, Venezuela.

Teaching Experience

At the University of Texas at San Antonio:

- 2021 MAT1193 (3h), Fall, Calculus for the Biosciences.
- 2021 MAT5983 (3h), Fall, Topics in Applied Mathematics: Data Analytics I.
- 2021 MAT4953 (3h), Fall, Special Studies In Mathematics: Data Analytics I.
- 2021 MAT5983 (3h), Spring, Topics in Applied Mathematics: Data Analytics I.
- 2020 MAT1214 (4h), Fall, Calculus I.
- 2020 MAT5983 (3h), Fall, Topics in Applied Mathematics: Modeling COVID-19.
- 2020 MAT6953 (3h), Summer, Independent Study.
- 2020 MAT4913 (3h), Spring, Independent Study.
- 2020 MAT1073 (3h), Spring, Algebra for Scientists and Engineers.

At other institutions:

- 2017 MATH4780/6780 (3h). Spring - Mathematical Biology. University of Georgia (UGA).
- 2018 BINF8950 (3h). Spring - Systems Biology. UGA.
- 2018 BINF8950 (3h). Spring - Systems Biology. UGA.
- 2018 LACS1000 (3h). Spring - Introduction to Latin American and Caribbean Studies. UGA.
- 2017 MATH4500/6500 (3h). Fall - Numerical Analysis. UGA.
- 2017 FYOS1001 (1h). Fall - Modes of Knowledge. UGA.
- 2017 STAT4510/6510(3h). Summer - Mathematical Statistics. UGA.
- 2017 MATH4780/6780 (3h). Spring - Mathematical Biology. UGA.
- 2016 FYOS1001 (1h). Fall - History of Science. UGA.
- 2016 GRSC8015 (1h). Fall - Data Management. UGA.
- 2016 BINF8950 (3h). Spring - Mathematical Biology. UGA.
- 2015 GRSC8015 (1h). Fall - Data Management. UGA.
- 2015 MATH2700 (3h). Fall - Differential Equations. UGA.

- 2015 BINF4005/6005 (3h). Spring - Computational Skills for Biology. UGA.
- 2014 MATH4780/6780 (3h). Fall - Mathematical Biology. UGA.
- 2014 MATH4750/6750 (3h). Spring - Transforms. UGA.
- 2013 MATH4780/6780 (3h). Fall - Computational Skills for Biology. UGA.
- 2013 MATH4780/6780 (3h). Spring - Mathematical Biology. UGA.
- 2012 BINF4005/6005 (3h). Fall - Computational Skills for Biology. UGA.
- 2011 Instructor of MAT152. Spring - Calculus I, Ohio State University, Columbus, Ohio.
- 2010 Instructor of MTH300/BIL385. Spring - Mathematical Models in Biology and Medicine, University of Miami, Coral Gables, Florida.
- 2009 Instructor of MAC-1140.23 Spring - Pre-calculus, Florida State University, Tallahassee, Florida.
- 2008 Instructor of MAP-2480.02,04 Fall - Biocalculus Computer Laboratory, Florida State University, Tallahassee, Florida.
- 2008 Online instructor of the Máster de estudios literarios en la era digital (M.A. Literary Studies in the Digital Age, *Universitat Oberta de Catalunya* (UOC), Barcelona, Spain.

Organized Workshops

- 2014 Organizer of the *Current Topic Workshop: "From Within Host Dynamics to the Epidemiology of Infectious Disease"*. Mathematical Biosciences Institute, April 7-11, 2014. <https://mbi.osu.edu/event/?id=715> As a result of this workshop, a special issue was organized in the journal *Mathematical Biosciences*. Volume 270, Part B, Pages 143-278 (December 2015) <https://www.sciencedirect.com/journal/mathematical-biosciences/vol/270/part/PB>
- 2018 Organizer of the *Emphasis Workshop: "Multiscale Dynamics of Infection"*. Mathematical Biosciences Institute, April 23-27, 2018. <https://mbi.osu.edu/event/?id=1140> As a result of this workshop, a special issue is being organized with a target date of December 2019.

Presentations (23 invited, 24 contributed)

- 2021 INVITED. [Maximizing insight with minimal \(and erroneous\) information: The case of COVID-19](#). GA Tech Mathematical Biology Seminar. Wednesday, September 15, 2021.
- 2021 CONTRIBUTED. Data, Reality, and Cognitive Dissonance On modeling what we don't see with data we don't have. Annual Meeting of the Society for Mathematical Biology. June 17, 2021.
- 2020 CONTRIBUTED. Modeling COVID-19 With Asymptomatic Carriers Under Lockdown Conditions. 3rd Annual Meeting of the SIAM Texas-Louisiana Section. October 17, 2020.
- 2020 CONTRIBUTED. Modeling COVID 19 With Asymptomatic Carriers Under Lockdown Conditions. Annual Meeting of the Society for Mathematical Biology. August 20, 2020.
- 2020 INVITED. [Automated Knowledge Discovery: A Case Study](#). Pacific Northwest National Lab. Mathematics for Artificial Reasoning in Science. May 27, 2020.
- 2020 INVITED. [COVID-19 Projections](#). Mathematical Biosciences Institute at Ohio State University. Workshop on Mathematical and Computational Methods in Biology. May 7, 2020.

- 2020 INVITED. City of San Antonio Leadership Meeting for COVID-19. City Mayor, CEOs of hospitals, STRAC, SAMHD. March 31, 2020.
- 2019 INVITED. Machine Learning in Biomedical Sciences. Trinity University, Mathematics Colloquium. October 15, 2019.
- 2019 INVITED. [Machine Learning in Biomedical Sciences: A Case Study in Malaria](#). Texas Tech University. TTU Workshop: Scientific Computing meets Machine Learning and Life Sciences.
- 2019 INVITED. Machine Learning in Biomedical Research. National Academies of Science, Engineering, and Medicine: Math Frontiers Webinar Series. [Video and Presentation](#).
- 2018 INVITED. From Molecular Dynamics to Epidemiological Processes of Malaria. International Congress of Mathematics, Satellite Meeting for Mathematical Biology. University of Miami, July 26-29, Coral Gables, FL.
- 2018 INVITED. Talk & Showcase of literary work: De arcilla y bytes (Of clay and bytes). Lorem Bitsum, Festival de Literatura Electrónica. Casa del Lector, Junio 9, Madrid, Spain.
- 2018 INVITED. Multiscale Systems Biology: A Case Study Linking Molecular Dynamics to Epidemiological Processes of Malaria. Emphasis Workshop: Multiscale Dynamics of Infection. Mathematical Biosciences Institute, Ohio State University, April 23-27, 2018, Columbus, OH.
- 2017 INVITED. Talk & Poster: Challenges and Future Directions in Big Data Analytics and its Application in Health Informatics. 23rd ACM SIGKDD Conference of Knowledge, Discovery, and Data Mining. August 13-17, 2017, Halifax, Nova Scotia, Canada. http://videlectures.net/kdd2017_panel_big_data_analytics/
- 2017 INVITED. Multi-scale analysis of malaria: How molecular patterns of disease emerge at continental scales. Center for Infectious Disease Dynamics, Pennsylvania State University. September 4, 2017, University Park, PA.
- 2017 INVITED. Multi-scale analysis of malaria: How molecular patterns of disease emerge at continental scales. Systems Biology and Bioinformatics Seminar, Emory University. August 2, 2017, Atlanta, GA.
- 2017 CONTRIBUTED. Talk: Modeling Across Scales: From Data Sparsity to Data Overload. 2017 Annual Meeting of the Society for Mathematical Biology. July 20, 2017, Salt Lake City, UT.
- 2017 CONTRIBUTED. Talk: Modeling Across Scales: From Data Sparsity to Data Overload. 2017 Annual Meeting of the Society for Mathematical Biology. July 20, 2017, Salt Lake City, UT.
- 2017 INVITED. Malaria Systems Biology: From Genes to Environment. Georgia Scientific Computing Symposium 2017. February 25, 2017, Athens, GA.
- 2016 CONTRIBUTED. Poster: Within-Host Mathematical Models of Malaria Built from Multi-omic Datasets. 65th Annual Meeting of the American Society of Tropical Medicine and Hygiene. November 13-17, 2016, Atlanta, GA.
- 2016 INVITED. Multiscale Systems Biology: From Genes to Environment. Emphasis Workshop: Population Models in the 21st Century. Mathematical Biosciences Institute, Ohio State University, June 13-22, 2016, Columbus, OH. <https://mbi.osu.edu/video/player/?id=4181>.
- 2016 INVITED. A most urgent contribution: Systems Biology of Malaria. Math Honors Day, Mercer University. March 24, 2016, Macon, GA.
- 2016 INVITED. Vector-Borne Diseases. US-Canadian Institutes Epidemiology Summer School: Mathematical Modeling of Infectious Disease Spread. Mathematical Biosciences Institute, Ohio State University, June 13-22, 2016, Columbus, OH. <https://mbi.osu.edu/video/player/?id=4023>

- 2015 CONTRIBUTED. Talk: Multiscale analysis of malaria. The Fourth International Conference on Mathematical Modeling and Analysis of Populations in Biological Systems: Mathematical Modeling of Complex Dynamics from Cells to Ecosystems. October 4-6, Lubbock, TX.
- 2015 INVITED. The case for science engineering: Systems Biology of Malaria. Georgia Scientific Computing Symposium 2015. June 4, 2017, Georgia Institute of Technology, Atlanta, GA.
- 2015 CONTRIBUTED. Talk: Hemodynamic model of malaria infection with detailed immune response. The Ninth IMACS International Conference on Nonlinear Evolution Equations and Wave Phenomena: Computation and Theory. April 1-4, 2015, Athens GA.
- 2014 INVITED. Systems Biology of Malaria: From Genes to Environment. The Secret Life of Malaria... A Global Journey to Cure and Prevention. One Health at UGA. March 19, 2014, University of Georgia, Athens, GA. <https://www.youtube.com/watch?v=PQ1Z25qPbIk>
- 2014 INVITED. From Within-Host to Between-Host Dynamics. Systems Biology of Epidemiology. Minisymposium "Mathematical Models in Biology and Epidemiology" of SIAM-Life Sciences 14. August 5-6, Charlotte, NC.
- 2013 INVITED. Systems Biology of Malaria: From Genes to Environment. Seminar of the Department of Mathematics, Georgia State University, October 14, 2013, Atlanta, GA.
- 2013 CONTRIBUTED. Talk: Systems Biology of Epidemiology. The Mathematical Congress of the Americas. August 6, 2013, Guanajuato, Mexico.
- 2013 CONTRIBUTED. Poster: Species Propagation Fronts in Dendritic Domains. The Mathematical Congress of the Americas. August 7, 2013, St. John's College, Santa Fe, New Mexico.
- 2013 CONTRIBUTED. Systems Biology of Epidemiology: From Genes to Environment. Systems Biology of Infection Symposium. June 24-27, 2013. Monte Verità, Ascona, Switzerland.
- 2013 INVITED. Information System-Based Research: A scientific foundation to optimize use of resources and guide public health policies. II Simposio Perspectivas de Eliminación de la Malaria en América Latina. July 27-29, Bogota, Colombia.
- 2012 CONTRIBUTED. Poster: Mathematical Analysis of Asymptomatic Malaria as a Species Competition Problem. Multiscale Modelling in Medicine and Biology. September 3-4, 2012, University of Nottingham, Nottingham, UK.
- 2012 CONTRIBUTED. Poster: Mathematical Analysis of Asymptomatic Malaria as a Species Competition Problem. 61st Annual Meeting of the American Society of Tropical Medicine and Hygiene. November 13-17, 2012, Atlanta, GA.
- 2012 CONTRIBUTED. Talk: Asymptotic Estimates of Asymptomatic Malaria Persistence in Low Endemicity Areas of Latin America. Annual meeting of the Bio Medical Engineering Society (BMES). October 24-27, 2012, Atlanta, GA.
- 2010 CONTRIBUTED. Talk: An Application of Global Attractors in Spatial Ecology: How to Predict the Success of Intervention against Invasive Species. 7th International Conference on Differential Equations and Dynamical Systems, University of South Florida. December 15-18, 2010, Tampa, FL.
- 2010 INVITED. Genetic Control of Invasive Species: Population Dynamics of the Predator Within. Florida Atlantic University. February 11, 2010, Boca Raton, FL.
- 2009 CONTRIBUTED. Talk & Poster: A Trojan Y Chromosome Model for Eradication of Exotic Species in a Riverine System. Second SIAM Gators Student Conference. University of Florida. March 3-5, 2009, Gainesville, FL.

- 2008 CONTRIBUTED. Workshop Presentation: Creating out of the Machine. Hypertext 2008. ACM Conference on Hypertext and Hypermedia. June 19-21, 2008 - Pittsburgh, Pennsylvania.
- 2007 CONTRIBUTED. Poster: Summer 2007 Program on the Geometry and Statistics of Shape Spaces. Statistical and Applied Mathematical Sciences Institute (SAMSI). Presented a poster about brain pattern classification and the Bio-Structural Classification Database. July 7-13, Research Triangle Park, NC.
- 2007 CONTRIBUTED. Showcase: Literatronica. Presented at the Exhibit of Mathematical Art of the National Meeting of the American Mathematical Society. Jan 5-8, New Orleans, LA.
- 2007 CONTRIBUTED. Talk: Generalized Trojan Gene Hypothesis. Presented at the National Meeting of the American Mathematical Society. Jan 5-8, New Orleans, LA.
- 2006 CONTRIBUTED. Paper & Talk: Literatronic: Use of Hamiltonian Cycles to Produce Adaptivity in Literary Hypertext. Presented at The Bridges Conference 2006: Mathematical Connections in Art, Music, and Science. Aug 4-9, London, UK.
- 2006 CONTRIBUTED. Talk: A Cost-Based Approach to Adaptivity in Literary Hypertext. Presented at the National Meeting of the American Mathematical Society. Jan 12-15, San Antonio, TX.
- 2005 CONTRIBUTED. Talk: Trojan Genes. A Guide to Get Rid of Invasive Species. Presented at Mathematical Association of America 26th Big Bend Region Annual Meeting. Oct 28, Tallahassee, FL.
- 2005 CONTRIBUTED. Talk: A Graph-Based Algorithm for Adaptive Literary Hypertext. Presented at Disjunctions 2005: Theory Reloaded, University of California, Riverside's Twelfth Annual Humanities Conference. Apr 8-9, Riverside, CA.

Programmatic Meetings

- 2017 Principal investigators meeting of the Technologies for Host Resilience program, DARPA. October 20, 2017, Arlington, VA.
- 2017 Programmatic meeting of the systems biology groups of the National Institute of Allergies and Infectious Diseases (NIH's NIAID). May 7-10, 2017, Chicago, IL.
- 2016 Systems Biology Data & Modeling Working Groups of the NIH's NIAID. December 1, 2016, New York, NY.
- 2016 Programmatic meeting of the systems biology groups of the NIH's NIAID. April 11-13, 2017, New York, NY.
- 2016 Systems Biology Data & Modeling Working Groups of the NIH's NIAID. Jan 21-23, 2016, Seattle, WA.
- 2016 Programmatic meeting of the International Centers for Excellence in Malaria Research (ICEMR), NIH's NIAID. August 15-20, 2016. Kampala, Uganda.
- 2015 Programmatic meeting of the ICEMRs, NIH's NIAID. August 17-21, 2015. Cali, Colombia.
- 2014 Programmatic meeting of the ICEMRs, NIH's NIAID. August 26-28, 2014. Lima, Peru.
- 2013 Programmatic meeting of the ICEMRs, NIH's NIAID. August 19-24, 2013, Guilin, China.
- 2012 Programmatic meeting of the ICEMRs, NIH's NIAID. August 22-25, 2012. Goa, India.
- 2011 Programmatic meeting of the ICEMRs, NIH's NIAID. August 15-19, 2012. Lusaka, Zambia.

Workshops

- 2016 Quantitative Biology Workshop at Spelman College, Friday, March 11, 2016, Atlanta, GA.
- 2011 SACNAS Summer Leadership Institute. July 25-29, 2011. AAAS National Office, Washington D.C.
- 2011 BIRS Workshop 11w5106, Emerging Challenges at the Interface of Mathematics, Environmental Science and Spatial Ecology. July 3-8, 2011. Banff International Research Station, Alberta, Canada.
- 2011 AIM Workshop: Careers in academia. June 20-24, 2011. American Institute of Mathematics, Palo Alto, CA.
- 2010 Using Glenn, the IBM Opteron 1350 at the Ohio Supercomputer Center. OSC. October 19-20, 2010, Columbus, OH.
- 2010 Mathematical Modeling of Plant Development. Mathematical Biosciences Institute, OSU. September 27-October 1, 2010, Columbus, OH.
- 2010 Bootcamp in Cancer Modeling. Mathematical Biosciences Institute, OSU. September 7-10, 2010, Columbus, OH.
- 2010 Workshop for Young Researchers in Mathematical Biology. Mathematical Biosciences Institute, OSU. August 30 - September 1, 2010, Columbus, OH.
- 2010 Mathematical Neuroendocrinology. Mathematical Biosciences Institute, OSU. August 9-13, 2010, Columbus, OH.
- 2007 Image Processing for Random Shapes, Applications to Brain Mapping, Geophysics and Astrophysics. Institute for Pure and Applied Mathematics, UCLA. May 21-25, 2007, Los Angeles, CA.
- 2007 Program on the Geometry and Statistics of Shape Spaces. Statistical and Applied Mathematical Sciences Institute (SAMSI). July 2007, Research Triangle Park, NC.
- 2006 SC06 - The International Conference for High Performance Computing Networking and Storage. Nov 11-17, 2006, Tampa, FL.

Outreach

I have developed materials in English and Spanish for a mini-course in Monster Epidemiology to introduce middle and high-school students to applied mathematical thinking. I plan to offer this annual event for the foreseeable future.

- 2018 Workshop for middle and high-school students in the Athens/Clarke/Oconee tri-county area: Monster Epidemiology. University of Georgia, July 9-13, 2018, Athens, GA.
- 2017 Invited Talk: True, Right, Correct, or Proven? A guide to modes of thinking. Acropolis - Athens Innovation Festival. April 24, 2017, Athens, GA.
- 2016 Workshop for middle and high-school students in the Athens/Clarke/Oconee tri-county area: Monster Epidemiology. University of Georgia, July 18-22, 2016, Athens, GA.
- 2015 Workshop for middle and high-school students in the Athens/Clarke/Oconee tri-county area: Monster Epidemiology. Athens Academy, February 4, 2015, Athens, GA.

MONSTER EPIDEMIOLOGY

Directed by Dr. Juan B. Gutierrez – jgutierr@uga.edu
 Department of Mathematics
 Institute of Bioinformatics
 University of Georgia

In this workshop we will produce mathematical models to predict the outcome of an encounter between a healthy human population (for example, the town of Watkinsville) and a few mythical creatures. We will study: (a) humans vs. one zombie, (b) humans vs. one vampire, and (c) humans vs. a competition between several vampires and several werewolves. Not only we will learn how to predict who wins, but also what are the best strategies to contain these mythical monsters. The mathematical tools used in this workshop belong to the same family of models used to guide public health policies against infectious diseases.

Image source:
<http://blog.esinearticles.com/2013/10/what-writers-can-learn-from-zombies-werewolves-and-vampires.html>

Attendants are encouraged to bring a laptop (preferable) or an iPad to run open source free software. Laptop users should install Scilab beforehand. iPad users should install XPP beforehand. Those without laptops or tablets are welcome to attend; a computer will be provided.

July 9-13, 2018. Registration is open now! Go to: <http://torsor.github.io/mathcamp> Contact: ugamathcamp@gmail.com
 Mention interest in **MONSTER EPIDEMIOLOGY** on the registration form

Figure 1: See section ‘Outreach’ for a description of the Monster Epidemiology workshop

Service

- Current member of the Editorial Board of Mathematical Biosciences (Elsevier).
- Current member of the Editorial Board of Mathematics (MDPI).
- Current member of the Public Affairs and Government Relations committee at SACNAS.

Media Coverage

- 2020-21 Forty six media articles (radio, newspapers, magazines, television) regarding forecasting work on COVID-19. See <https://mathresearch.utsa.edu/wp/?p=182>
- 2019 Hispanic Outlook on Education Magazine. *Latin American And Latino STEM Education. Technology Program Helps Latinos (And All) Learn STEM*. Michelle Adam (USA). Jan, 2019. <https://www.hispanicoutlook.com/articles/latin-american-and-latino-stem-education> [Online; accessed 5-Feb-2019]
- 2009 Conservation Magazine. *Operation Sex Change*. Cynthia Mills (WA, USA). Conservation Magazine, a publication of the Society for Conservation Biology, Sep 2009. <http://conservationmagazine.org/2009/07/operation-sex-change/> [Online; accessed 25-Feb-2015]
- 2008 ScienceLine. *Supermales to the rescue*. Rachel Mahan. Jan, 2008. New York, NY. <http://scienceline.org/2008/01/11/env-mahan-invasives/> [Online; accessed 25-Feb-2015].
- 2007 Nature News. *Sex change wipes out invasive species*. Louis Buckley. July, 2007. London, UK. <http://dx.doi.org/10.1038/news070723-9> [Online; accessed 25-Feb-2015].

2007 Trends in Ecology & Evolution. *Control of introduced species using Trojan sex chromosomes*. Samuel Cotton and Claus Wedekind (Switzerland). Trends in Ecology & Evolution 22(9), pp. 441-3, 09-2007. DOI: [10.1016/j.tree.2007.06.010](https://doi.org/10.1016/j.tree.2007.06.010).

2007 NCR Hansdelsblad. *Vrouwttjes verdrijven (Females away)*. Sander Voormolen. 2007. Rotterdam, Netherlands. <https://www.nrc.nl/nieuws/2007/08/16/vrouwttjes-verdrijven-11375285-a1260938> [Online; accessed 5-Feb-2019].

Information Technology Skills

I have know-how and experience in designing and implementing complex multi-tier information systems that integrate numerical algorithms (microcontrollers to supercomputers), relational databases, data mining, remote sensing & GIS, telecommunication, and user interfaces.

- *Operating Systems*: OS compatibles with the Portable Operating System Interface (POSIX) (UNIX, Linux, MacOS, Windows), DOS.
- *Computer Languages*: C++, C, Fortran, Python, VB.NET, C#, ASP.NET, Java, JSP, JavaScript, SQL (ANSI and vendor variants such as T-SQL and PL-SQL).
- *Mathematics Software*: MATLAB, Maple, Scilab, R.
- *Relational Database Management Systems*: SQL Server, Oracle, MySQL, PostgreSQL, MS Access.
- *Geographic Information Systems*: Map Windows, ArcGIS, MATLAB Mapping Toolbox.
- *Development Tools and Technologies*: Visual Studio, Eclipse, and productivity tools (LaTeX, MS Project/Office, HTML, XML/XSL, ArcXML).
- *Hardware Design*: AutoCAD, Arduino, G-Code for CNC (drill mill, lathe), 3-D printing, Raspberry Pi.
- *Certifications*: MCSD.NET - Microsoft Certified Solution Developer for .NET.
